## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 11, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Walton, U. S. Patent 3,996,879.

3. Walton teaches a reminder device comprising a plastic collar 14 adapted to be placed on a bottle having an information surface 20 with an upper end and a lower end. The collar also has a lower lip with a groove/slot 22 and an upper lip with a groove/slot 22 to device a recess area 18. Within the recess and attached to the information surface or the wall of the recess is place a display sheet 24. The display sheet is held within the groove or slots 22.

With respect to claim 6, the method limitation drawn to the injection molding process for forming the collar has not been given patentable weight in the article claim.

### ***Allowable Subject Matter***

4. Claims 7-10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

**Conclusion**

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show collar attached to bottles: Wallace, Jr. - 4,951,596 and Shrader - 6,412,632.
